

## PROFESSIONAL SUMMARY

---

Highly skilled Remote Front End Engineer with 3+ years of experience developing and implementing responsive design frameworks, optimizing website performance, and collaborating with cross-functional teams to drive user engagement and revenue growth. Proven track record in increasing mobile traffic by 25%, reducing page load times by 40%, and improving user satisfaction scores by 20%.

## WORK EXPERIENCE

---

- 
- Optimize the admin user for Events, Categories, and Business, enhancing search, and boosting user engagement by 30%.
  - Streamline API designs, reducing response times by 40% and improving data handling efficiency.
  - Pioneer the development of the website with Nuxt frontend for the API, implementing various user interface features that received positive feedback from users in internal testing.
  - Participated in daily stand-up meetings and code reviews, providing constructive feedback to other team members and receiving positive feedback for effective communication and helpful contributions.

- 
- Boosted website performance through code optimization, and reduced load times by 35%.
  - Revitalized the codebase, enhancing maintainability, and reduced bug reports by 25%.
  - Contributed to the developing React frontend for the API, implementing various user interface features.
  - Amplified team productivity by introducing best practices and efficient workflows, increasing output by 20%.
  - Spearheaded the development of new modules, expanding platform functionality by 40% and driving user growth by 25%.

- 
- Implemented robust security measures, safeguarding user data and maintaining compliance with industry standards, resulting in a 50% reduction in security incidents.
  - Designed an FAQ section, improving user experience, and reducing customer support inquiries by 25%.
  - Strategized and implemented 10+ new features, aligning technical solutions with business goals and increasing user engagement by 15%.
  - Steered cross-functional teams to deliver high-quality projects on time, achieving a 95% on-time delivery rate.
  - Adhered to quality control standards, maintaining a 99% defect-free rate in deliverables.

- 
- Orchestrated closely with cross-functional teams, including backend developers and designers, to ensure project delivery by 60%.
  - Supervised project planning, estimation, and task prioritization, contributing to an 85% project deadline adherence rate.
  - Integrated 5+ RESTful APIs for data retrieval and manipulation, ensuring proper error handling and data validation, leading to a 30% reduction in data-related issues.
  - Resolved the architecture using the latest version of React, enhancing maintainability and scalability, and improving customer satisfaction by 20%.
  - Collaborated with the DevOps team to implement continuous integration and continuous delivery (CI/CD) practices, reducing software release times by 50% and minimizing production issues by 30%.

## SKILLS

---

Programming language: Python, JavaScript

Technologies: React.js, Vue.js, Next.js, Nuxt.js, Nest.js, GraphQL, TailwindCss, Django, Redux, WordPress

Tools: Docker, Prisma, TypeORM, Git/ GitHub/ Gitlab, AWS, Cloudflare,

Databases: MySQL, MongoDB, PostgreSQL, Firebase, Supabase

Methodologies: Scrum, Agile, Frontend Engineering Design(FEED), Test Driven Design ( TDD), Design system, Clean code, Pair Programming, Open Source.

## EDUCATION

---

Petroleum Engineering | Bachelor of Engineering | Federal University of Petroleum Resource | 01/2018 – 03/2024  
Warri

- Participated with the Society of Petroleum Engineers, FUPRE chapter, contributing to 10+ events and initiatives annually.
- Carried out 5 comprehensive literature reviews and led 3 research projects, demonstrating a strong understanding of academic research methodologies.
- Acquired Proficient in conducting data analysis, and utilizing statistical methods to achieve a 20% improvement in manufacturing processes.
